

Maryvale Mill shut: Investing in our future growth

In August, Australian Paper will invest \$51 Million in our annual maintenance and capital works shut. This 26 day break will be one of the longest in our 81 year history.

These major works are part of a \$200 Million, 5 year capital investment program currently underway at Australian Paper Maryvale.

- **\$51 Million** investment
- More than **30 capital works** and **3,500** individual maintenance projects
- Over **1,000** workers onsite during peak periods completing **66,000** hours of work
- More than **50 local businesses** involved

Zero Harm is Australian Paper's key focus - THINK SAFE, WORK SAFE, HOME SAFE for everyone working at Australian Paper Maryvale.

Lime Kiln Restoration

The Lime Kiln at Maryvale is 106 metres in length, operates at 1,000°C and is central to our chemical recovery process. This restoration is a \$5.5 Million investment.

- Higher production output
- Increased efficiency

R5 Recovery Boiler Upgrade

The R5 Recovery Boiler is a key piece of power generation infrastructure making us Victoria's largest producer of renewable baseload energy. This upgrade is a \$17.5 Million investment.

- Increased reliability
- Reduced maintenance cost
- Increased capacity

M4 Rebuild

M4 is Australian Paper's largest paper machine, producing 225,000 tonnes per annum of high quality board for Australia's booming packaging market. This rebuild is a \$15 Million investment.

- Increased product quality
- Improved efficiency
- Higher production output

Australian Paper. Sustainable Growth for the Next Generation.
